Coconut Embryo In Vitro Culture

Proceedings of the first workshop on Embryo Culture
27 - 31 October 1997
Banao, Guinobatan, Albay, Philippines

Pons A. Batugal and F. Engelmann, editors

IPGRI is an institute of the Consultative Group on International Agricultural Research (CGIAR)

Hosted by:
Albay Research Center of The Philippine Coconut Authority

Sponsored by:
International Plant Genetic Resources Institute (IPGRI)
Common Fund for Commodities (CFC)
Department For International Development (DFID), U.K.

The International Plant Genetic Resources Institute (IPGRI) is an autonomous international scientific organization, supported by the Consultative Group on International Agricultural Research (CGIAR). IPGRI's mandate is to advance the conservation and use of plant genetic resources for the benefit of present and future generations. IPGRI's headquarters is based in Rome, Italy, with offices in another 14 countries worldwide. It operates through three programmes: (1) the Plant Genetic Resources Programme, (2) the CGIAR Genetic Resources Support Programme, and (3) the International Network for the Improvement of Banana and Plantain (INIBAP). The international status of IPGRI is conferred under an Establishment Agreement which, by January 1998, had been signed and ratified by the Governments of Algeria, Australia, Belgium, Benin, Bolivia, Brazil, Burkina Faso, Cameroon, Chile, China, Congo, Costa Rica, Côte d'Ivoire, Cyprus, Czech Republic, Denmark, Ecuador, Egypt, Greece, Guinea, Hungary, India, Indonesia, Iran, Israel, Italy, Jordan, Kenya, Malaysia, Mauritania, Morocco, Pakistan, Panama, Peru, Poland, Portugal, Romania, Russia, Senegal, Slovak Republic, Sudan, Switzerland, Syria, Tunisia, Turkey, Uganda and Ukraine.

Financial support for the Research Agenda of IPGRI is provided by the Governments of Australia, Austria, Belgium, Brazil, Bulgaria, Canada, China, Croatia, Cyprus, Czech Republic, Denmark, Estonia, F.R. Yugoslavia (Serbia and Montenegro), Finland, France, Germany, Greece, Hungary, Iceland, India, Ireland, Israel, Italy, Japan, Republic of Korea, Latvia, Lithuania, Luxembourg, Malta, Mexico, Monaco, the Netherlands, Norway, Pakistan, the Philippines, Poland, Portugal, Romania, Slovakia, Slovenia, South Africa, Spain, Sweden, Switzerland, Thailand, Turkey, the UK, the USA and by the Asian Development Bank, Common Fund for Commodities, Technical Centre for

Table of Contents

Foreword

Part I. Papers presented to evaluate the status of research on coconut embryo culture and identify research gaps

COGENT and 1997 activities; workshop objectives and expected outputs - Pons A. Batugal
Current state of the art and problems with in vitro culture of coconut embryos - Florent Engelmann
Status of research on coconut embryo culture and acclimatization techniques in UPLB - Aurora G. Del Rosario
State of research on coconut embryo culture and acclimatization techniques in the IDEFOR (Côte d'Ivoire) and ORSTOM/CIRAD laboratories (France) - J.L. Verdeil, V. Hocher, K. Triques, R. Lyakurwa, A. Rival, T. Durand-Gasselin, F. Engelmann, A. Sangare and S. Hamon
Status of research on coconut embryo culture and acclimatization techniques in India - Anitha Karun, Anuradha Upadhyay and V.A. Parthasarathy
Status of research on coconut embryo culture and acclimatization techniques in Indonesia - Nurhaini Mashud
Status of research on coconut zygotic embryo culture and acclimatization techniques in Mexico - C. Talavera, C. Oropeza, A. Cahue, J. Coello and J. Santamaría
Embryo culture activities at the Philippine Coconut Authority-Zamboanga Research Center (PCA-ZRC) - Ambrosio Raul R. Alfiler
Status of coconut (Makapuno) embryo culture and acclimatization techniques in ViSCA, Baybay, Leyte, Philippines - Víctor M. de Paz
PCA's embryo culture technique in the mass production of Makapuno coconuts - Erlinda P. Rillo
Status of research on coconut embryo culture and acclimatization techniques in Papua New Guinea - Tore Ovasuru and Mathias Faure
Status of research on coconut embryo culture and acclimatization techniques in Sri Lanka - V R M Vidhanaarachchi, L K Weerakoon, S C Fernando, C K A Gamage and E S Santha
Status of research on coconut embryo culture and acclimatization techniques in Tanzania - Kennedy Mkumbo, Salustia Tembo and Reminister Marealle

Part II. Proposed coordinated research to address identified research gaps

Improving in vitro coconut zygotic embryo culture - Project for Brazil - Project Leaders Paula Cristina da S. Angelo Ederlon Ribeiro de Oliveira
Increasing the efficiency of embryo culture technology to promote germplasm collecting - Project for Cuba - Project Leader Jorge Rolando Cueto
Improving the efficiency of coconut zygotic embryo culture: A physiological and biochemical approach Project proposal of ORSTOM/CIRAD-CP, France - Project leaders Jean-Luc Verdeil, Valérie Hocher, Alain Rival and Serge Hamon
Increasing the efficiency of embryo culture to promote germplasm collecting - Project for India - Project Leader Anuradha Upadhyay
Increasing the efficiency of embryo culture technology to promote coconut germplasm collecting, conservation and exchange - Project for Indonesia - Project Leader Nurhaini Mashud
Improvement of embryo culture efficiency for the safe movement of coconut germplasm Project for Mexico - Project Leader Carlos Oropeza
Utilization of embryo culture technology for germplasm conservation: development of medium-term conservation for coconut zygotic embryos - Project for Philippines - Project Leader Olivia Damasco
Improvement of coconut embryo culture efficiency for germplasm collecting and conservation - Project for Philippines - Project Leader Aurora G. del Rosario
Development of an improved embryo culture protocol for coconut - Project for Philippines - Project Leaders Erlinda P. Rillo and Ambrosio Raul Alfiler
Increasing the efficiency of embryo culture technology to promote coconut germplasm collecting and exchange - Project for Sri Lanka - Project Leader Vijitha Vidhanaarachchi
Increasing the efficiency of in vitro culture of zygotic coconut embryos To promote germplasm collecting - Project for Tanzania - Project Leader Kennedy E. Mkumbo
Increasing the efficiency of coconut embryo rescue to facilitate collecting and the safe movement of germplasm - Project for Papua New Guinea - Project Leader Tore Ovasuru

Annexes

Annex 1. Coconut embryo culture protocol at PCA
Annex 2. Coconut embryo culture protocol at UP Los Baños
Annex 3. Coconut embryo culture protocol at CPCRI, India
Annex 4. Coconut embryo culture protocol at ORSTOM
Annex 5. Media composition for coconut embryo culture (mg/l)

Appendix I. List of Participants
